

Future Innovators in Tech & Engineering

July 18-29th

9:30 AM-4:00 PM

SUNY BUFFALO STATE

Presented by

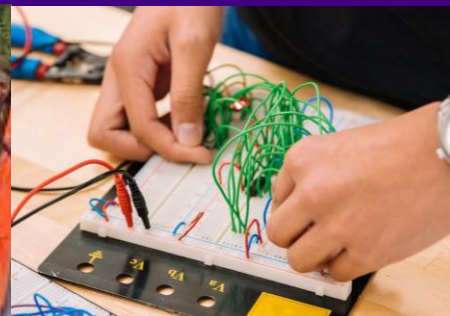

nationalgrid

FREE

STEM Summer program

This 10-day program will offer rising 10th and 11th graders from populations typically underrepresented in STEM an immersive experience in engineering technology and creative problem solving. Students will get hands-on in our state-of-the-art smart grid lab and use one of a kind tech to play with energy. They will tour a National Grid site and work together to solve real world challenges. The program also includes time for campus tours and teambuilding fun!

**Build.
Solve.
Create.**
